ORDER QUANTITY	660

QUOTE PER PALLET

*Load uniformity distributed on pallet deck sheet. Actual load capacity is load specific and dependent on the general environment, product and packaging used to contain the subject load on the pallet. The testing of a TCPC pallet with the intended end use application is strongly recommended. Figures provided are based on testing completed by TCPC in 2014.

Truckload quantities above are based on a 53' truck.

Pallet Weight Figure is an approximate figure.

Tolerances on all drawings are +/- 3/4" unless otherwise specified.

Runners are printed with corrugatedpallets.com

Pallets are shipped in bundles. Two bundles per stack. For orders of 4 and 8 stacks, bundles are secured with two nylon straps. For orders greater than half a trailer pallets are not banded with two nylon straps.

Pricing on this product is impacted by the changes in paper commodity costs and is subject to change when our suppliers of linerboard and medium adjust their costs. A minimum of 60 days notice will be provided should market conditions change. Orders may vary +/- 10%.
